

ECO Blend™

Putting Plastic to Work Again

CAN LINERS

STRONG • RELIABLE • RECYCLED

Use once and throw it away is a practice of the past. High energy costs, landfill problems, and the need to be more protective of our environment make recycling plastic a smart way to go.

ECO Blend Can Liners from Wisconsin Film & Bag "Puts Plastic Back to Work Again." Made from carefully selected recycled plastic, these can liners provide the strength to do the job the way you expect.

You can use ECO Blend with confidence. High-performance, recycled can liners make good business sense for both you and the environment.

With ECO Blend, it doesn't have to cost more to do the right thing!

The Result...Recycling Plastic Offers:

- An opportunity to use less energy while reducing volume in our landfills.
- An opportunity to use recycled plastic as a raw material to make more products—rather than using oil.
- An opportunity to save 11 barrels of oil (for every ton of recycled plastic).
